

## MEEST CORPORATION INC.

### **Transportation rules (for AIR parcels only) of products containing lithium batteries**

Due to the increased attention to the safety of air transportation were revised requirements for transportation of lithium batteries by passenger aircrafts. According to these requirements, packages containing lithium batteries must be respectively packed and marked with special labels.

MEEST Corporation accepts ( for AIR parcels only) electronic devices or equipment with built-in lithium ion batteries (Li-ion batteries). A lithium battery is a type of battery that can be recharged.

#### **EXAMPLES OF GOODS THAT CAN BE SHIPPED IN AIR PARCELS:**

Handheld devices: iPad, iPhone, Apple Watch, MacBook, other mobile phones and smartphones, laptops and tablets, digital cameras and video cameras, wireless headphones, e-cigarettes, portable gaming attachments and battery flashlights. Power tools: wireless drills, grinding machines, saws, garden tools.

**In no case is it allowed to transfer only the batteries themselves separately.**

#### Packing rules for goods containing lithium-ion batteries:

Devices with lithium ion batteries should be packed in cardboard boxes SEPARATELY and reliably.

A single box can have one or more devices with built-in lithium batteries.

Boxes must have the name and address of the sender and recipient.

Boxes must be marked with red stickers that you will receive, to facilitate their recognition by the main office. In packages containing devices with lithium-ion batteries, categorically it is forbidden to add any other things (clothing, household goods, products, food, etc ). MEEST does not accept goods and devices containing not rechargeable (lithium-metal) batteries, for example, AA, AAA, 9V, etc. These products include: drones, toys, calculators, watches, medical equipment, etc. Goods powered by such batteries can only be shipped by SEA. To send with AIR parcels the goods that work on lithium-metal batteries, it is necessary to extract these batteries from them.

#### **SPECIAL RULES for shipment to Armenia, Georgia, Kazakhstan, Kyrgyzstan, Uzbekistan:**

Only goods with lithium batteries (which can be recharged) can be sent to these countries (AIR Parcels Delivery only) separately, without other things in the package, according to the above rules. Items with non-rechargeable batteries (ex: AA, AAA, 9V, etc.) cannot be sent neither AIR nor SEA.

**SPECIAL rules for sending to Azerbaijan:** mobile phones are categorically not allowed in connection with the prohibition of customs in this country. Can be sent the laptop, tablet, or Apple Watch only - one device per package. The goods with any different batteries cannot be shipped at all - neither AIR nor SEA!

We remind you that any physical person, company or institution specified as sender on customs declaration, are fully legally responsible for Compliance with the forwarding conditions.
